Stitching and Assembling Instructions

3 Dimensional 'stuffed' Birds

1. Choose stitching fabric that is close in color to the design.
2. Stitch all colors step by step using thread sheet for both sides of the bird. Remove fabric from hoop, but do not trim fabric yet.
3. Pin the two sides together making sure the two sides are exactly together. Baste from the top of the beak, over head back down the top side of the bird to the tail feathers, then machine baste without power if possible. Open up the two sides to make sure they match, adjust and stitch permanently. Trim fabric all around to ¼" from the embroidery stitching and ***Fray Check*** seal raw edges.
4. Turn inside out, pushing bird head out gently. Fold raw edges in. With a needle and thread hand stitch folded edges together down from throat to end of feathers.
5. Stuff the closed area with cotton balls or batting, then a ***Darice Alligator Clip #1958-84**** can be put into the bird cavity (this is in the area where the legs would be) or you can attach a thread to the top back for hanging and eliminate the hardware.
6. With a needle and thread, hand stitch the clip in tightly, put more stuffing in until it is rounded, then close the rest of the bird leaving a space for the for the tail feathers*. Attach tail feathers to match.
7. Enjoy this unique machine cross stitch project!

* the clips are among the jewelry findings and the feathers are in general crafts dept.
